TO WHOM IT MAY CONCERN

REF: RECOMMENDATION LETTER

Bytronics Weigh Scales Limited automated the milk weighing receiving area at Brookside Dairy Limited Eldoret Cooling Plant 10 years ago. Since then, the company has continued to maintain the plant including its weighing equipment and milk receiving software.

In addition, Bytronics with its qualified and dedicated staff have developed quality products - custom weighing software that has integrated well with our systems.

We would therefore recommend Bytronics Weigh Scales to other companies that would like to automate their operations.

Yours faithfully

For and on behalf of Brookside Dairy Limited

O.B. Ayim
